FOOTPAD DERMATITIS ASSESSMENT

| Operation | name: |
|-----------|-------|
| Flock ID: | |

Date of placement: Date of assessment: Date sent to slaughter:

<u>Protocol</u>

Step 1: Determine how many flocks will go to slaughter on the same day

The minimum sample size is 100 birds if only one flock is sent to slaughter

If more than one flock is sent to slaughter, an additional 25 birds for each additional flock must be assessed

For example, if 3 flocks are sent to slaughter on the same day, the sample group must be 100 + 25 + 25 for a total of 150 birds A even, representative sample of birds across all flocks must be assessed (complete one assessment sheet per flock)

For example, if 3 flocks are sent to slaughter and 150 in total must be scored, 50 should be scored in each flock (for a total of 3 assessment sheets) Assess birds in 4 different locations for each flock

Step 2: It is important that the feet are clean before scoring changes to the skin You need to be able to differentiate between dirty feet and footpads that have Put a mark in the corresponding FPD score column

 Score 0
 Score 1
 Score 2

 No lesions or very small
 Mild and/or superficial lesions
 Severe and significant lesions

 No discoloration or slight on a limited area
 Substantial discoloration on the footpad
 Ulceration

 No hyperkeratosis or mild
 Dark papillae, no ulceration
 Dark papillae and ulceration

 Old or no scars
 Abscesses and/or swollen feet (bumble foot)
