KEEL BONE DEFORMITY ASSESSMENT (STEPS 5 and 5+)

Date:	Flock age (in weeks):	
House ID:	Flock size (when placed):	
Flock ID:	Breed/Strain of hens:	
•		

Score 0	Score	
No deformities detected	Deformity d	etected
LATERAL VOIW VERTINAL VOIW		

Protocol:

Step 5: Assess each flock during the last month of their laying lives

Step 5+: Assess each flock during the last month of each laying cycle

Randomly select 5 hens from 10 different locations throughout the house or pasture for a total of 50 hens.

Pick up each hen and while holding the hen, run two fingers down the edge of the keel bone (one finger on each side of the bone)

- If the bone feels straight with no bumps/depressions score the hen a '0'.
- If you feel any bumps, depressions, curves in the bone score the hen a '1'.

	GUIDANCE
Total number of Score 1 birds =	If 13 or more birds have a keel bone deformity score of 1, you must complete an intervention plan to reduce levels in subsequent flocks.
