BIOSECURITY PLAN

GLOBAL ANIMAL PARTNERSHIP

MEAT SHEEP	
Operation name:	
Operation address: *List all locations*	

Flock management:
List flock management procedures that protect sheep health (e.g., closed systems, disposal of dead animals, clean out procedures of housing and pens between groups of animals).

Employees:
List employee policies (e.g. dress code, footwear requirements, use of disinfectant foot baths, any other procedures if they own their own sheep etc.).

Trucks/equipment coming in:
List procedures and record keeping for trucks delivering equipment and/or feed to the farm (e.g. use of special laneways).

This template was created by Global Animal Partnership to provide a free resource for operation seeking G.A.P. certification. If you want to use this template in other ways, please contact G.A.P. at standards@globalanimalpartnership.org.

1

Visitor access:
List procedures for visitors to the farm (e.g. provision of foot baths, booties, and protective clothing; efforts to minimizing visitors, use of a log book and visible biosecurity signs, setting requirements for a minimum time between visiting someone else's farm and your operation, order of visiting youngest animals to oldest, hand washing, etc.).
Note: *This would also include visitors brought on the farm to perform a specific function such as fixing equipment.*

Bringing new or returning sheep to the operation:
List quarantine procedures to ensure new or returning animals do not introduce disease.
Note: *This includes both sheep that are purchased or have left the operation and are now returning (e.g., show lambs).*

Shared borders:
If the operation shares any borders, it could be a potential avenue for the operation being exposed to disease.
List the actions taken to prevent introduction of disease (e.g., set-a-side or barrier land around the perimeter, fencing etc.).
